Date: Wednesday, December 2, 2026
Time: 12:55 p.m. ET
Location: Coral Gables, FL

About Retension Pharmaceuticals
Retension Pharmaceuticals is a clinical-stage biopharmaceutical company focused on developing medicines for the treatment of hypertension and other cardiovascular diseases. The Company’s lead clinical candidate, RTN-001, is in development for patients with uncontrolled and resistant hypertension.

About RTN-001
Retension Pharmaceuticals is developing RTN-001, a cardiovascular-targeted, next-generation PDE5 inhibitor designed to enhance nitric oxide signaling in central arteries not adequately reached by first-generation PDE5 inhibitors, thereby addressing a core driver of hypertension. RTN-001 has been studied in multiple clinical trials totaling 265 enrolled subjects. In two Phase 2 pilot trials, RTN-001 has achieved clinically meaningful placebo-adjusted reductions in systolic blood pressure and diastolic blood pressure in patients with hypertension. A Phase 2b trial of RTN-001 in hypertension is ongoing. RTN-001 is being developed under an exclusive worldwide license from Sanofi S.A.
